

Besse Medical is pleased to offer you the Inventory Management Syringe Tracking Program, available exclusively through CubixxMD and PODIS Plus. We continue to take inventory management to new levels by offering this unique program through partnering pharmacies.

How does the Syringe Tracking Program work?

- Syringes obtained from a Besse pharmacy partner will arrive individually tagged and lot-tracked within either the CubixxMD or PODIS Plus systems
- No additional labeling, processing, etc.
- No need to purchase CubixxMD RFID tags or manually print and sticker in PODIS Plus. Your syringes arrive pre-labeled and lot-tracked

It doesn't get any easier than that...

How to get started

Besse has partnered with these pharmacies to provide your practice with individually tagged and tracked syringes. If you are already using CubixxMD or PODIS Plus, contact one of our partner pharmacies below.

PHARMACY PARTNER	PHONE	EMAIL
